

## Drilling without dust: *The Kärcher Drilling Dust Catcher.*

Held  
in place by  
vacuum stick  
function

---

No vacuum cleaner  
required

is how it is done:

**1. Line up**  
Once you have marked where you want to drill the hole, fit the DDC 50 on your drill and position it over the mark.

**2. Press on**  
Press the DDC 50 against the wall – the vacuum stick function holds it securely to the wall during the drilling process.

**3. Drill**  
Drilling with the DDC 50 is no problem. It sticks firmly to the wall and you have both hands free for the job in hand.

**4. Detach**  
After drilling the hole, press the vent button to release the vacuum, take the DDC 50 off the wall. The area around the hole is clean, all the dust has been collected.

**5. Empty**  
Open the DDC 50 and empty the dust into a suitable container. No cleaning up necessary.

## Kärcher DDC 50 – the clean solution for all do-it-yourselfers

- Drilling dust effectively collected
- No vacuum cleaner and no helper required
- Both hands free for drilling

## Holes can be drilled quickly ...

but drilling creates a lot of fine dust which tends to spread in all directions and is usually difficult to remove. Kärcher's DDC 50 drilling dust catcher helps you solve this problem. It is a neat device that attaches itself to the wall and collects drilling dust as it occurs, effectively and reliably - no need to clean up afterwards.

## Start drilling - and forget the dust

With the DDC 50 drilling dust catcher from cleaning equipment specialist Kärcher you can drill without creating dust. You need neither a helper nor any additional accessory or machine, such as a vacuum cleaner.

The DDC 50 can be used with any portable power drill (max drill bit dia. 10 mm), and you have both hands free for drilling. Suitable for all normal indoor wall surfaces.

- The DDC 50 drilling dust catcher allows you to work without a helper or any other device or accessory.

- The DDC 50 can be used with any portable power drill (max. drill bit dia. 10 mm).

- The handy DDC 50 has a patented vacuum-stick function, it attaches itself securely to all normal indoor surfaces. It leaves both your hands free for drilling.

- The DDC 50 comes standard with two 1.5 V Mignon batteries, ready for use. It can also be powered by rechargeable batteries.

- Also included is a removable protective cap for safe transport in a tool case. The cap can also be used as a wall bracket.
